Education

Indian Institute of Information Technology August 2024 – May 2028
Bachelor of Technology - Computer Science Lucknow, Uttar Pradesh, India
GPA: 8.88/10 *Transcript* *Coursework*

Experience

Formstr May 2026 – August 2026
Summer of Bitcoin Intern (Selected 1 of 50 among 3,272 global applicants; top 1.5%) Remote
Tech Stack: TypeScript, Node.js, Vitest, MCP Protocol, Nostr, Web3 ***My Contributions***

- Shipped **60+ merged pull requests** to production for the Formstr Super App, maintaining **88–91% statement coverage** across **778 Vitest** unit and end-to-end tests in 97 test suites.
- Architected **@formstr/mcp**, an MCP server whose **50+ tools** let AI agents run forms, calendar, notes and Kanban.
- Engineered the **Kanban and Calendar SDKs** with **role-based permissions** and **reactive local-relay stores**.
- Fixed a **critical security vulnerability** leaking NIP-44 wrapped events and **signing keys** into client exports.

Projects

LockIn – Open-Source MCP Server for AI Coding Agents ***GitHub: Sky-walkerX/LockIn***
Tech Stack: Next.js, React, TypeScript, PostgreSQL, Prisma, Python (FastAPI), MCP, Docker, GCP

- Built an **MCP server (18 tools)** on **GCP** letting **Claude Code, Codex and Cursor** resume each other's work from a **300-token handoff card**, with sessions auto-saved via **Claude Code hooks**.
- Stopped agents from trusting outdated notes by anchoring each note to its **Git commit** and filtering replaced notes out of **hybrid search and RAG** at read time, so undoing a rejected update takes **a single delete**.
- Cut database round trips per query **from 4 to 1** (**about 90 ms per call** in production) by moving to **Prisma 7's pg driver adapter** behind a **PgBouncer** transaction pooler.

Trequila – AI Travel Itinerary Planner ***GitHub: Sky-walkerX/Trequila***
Tech Stack: Go, NATS JetStream, PostgreSQL, Redis, Next.js, Heroku

- Architected a **distributed, event-driven Go backend** on NATS JetStream, fanning each HTTP request across **4 parallel micro-workers** and cutting end-to-end latency from **~2.5 min to 50–60 s**.
- Streamed partial itineraries to the Next.js frontend via **Server-Sent Events**, showing first results in **under 8s**.

Open Source Contributions

tauri-apps/tauri #13830 (Rust)

- added the macOS `set_simple_fullscreen` **API** via maintainer **code review** (**109k+ stars**).

bluewave-labs/Checkmate #2504 (React)

- refactored settings to one i18n-aware list in a **10k+ star monitoring** dashboard.

Achievements

- **ICPC Regionalist 2026** (India); ranked **AIR 137** in the ICPC India Prelims 2025.
- Achieved Global Rank **146** in Google CTF 2025.
- Secured **1st place** in Round 1 of Flipkart GridLock 2.0 among **35,000+** registered participants.
- Finished among the **Top 300** teams out of **21,000** teams in HackOn Amazon 6.0.
- **Expert** on Codeforces (max **1623**); **4-star** on CodeChef (max **1813**); **Knight** on LeetCode (max **1945**).

Technical Skills

Languages: TypeScript, JavaScript, Python, Go, C++, C, Java, Bash
Frameworks: React, Next.js, Node.js, Express, FastAPI, Prisma, Vitest, MCP, NATS JetStream, REST APIs
Cloud and Data: PostgreSQL, MySQL, MongoDB, Redis, Docker, GCP, AWS, Linux, Git, GitHub Actions, CI/CD
Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), Database Management Systems (DBMS), Microservices, Distributed Systems

Positions of Responsibility

- **Coordinator, Web Development Wing & Senior Member, FOSS Wing** *August 2026 – Present*
  Axios, the technical society of IIIT Lucknow
  - Conducted **30+ sessions** on **Web Development** and **FOSS**, covering Linux, Git, JavaScript, React and DevOps.
  - Built the society's website, **axiosiiitl.dev**, to showcase its work and activities.
